

3.2 Notes

x	$2x + 4$
input	output
# of posters	cost of order

Order of Operations

to simplify an expression or
to find the output

- ① M, D
- ② A, S

Solve an equation

find an input (x), given the
output

"Solver" CT-Unit 7

"undo" the order of operations

- ① A, S (make a zero
with the variable)
- ② M, D to solve for x
